## PREFACE

Sixth conference *Technics and Informatics in Education – TIO 2016* which acquired the status of an International conference for the first time this year, pursues an important objective to promote and support research in education of new generations in technical and technological fields at all levels of education, and contribute to technology development and education improvement.

For this Conference, some 86 papers have been submitted within various fields of technical, IT and technology-supported education at all education levels – primary, secondary, high education and education for adults. After reviewing, 71 papers have been accepted for current edition of Proceedings in the form of plenary lectures and original scientific papers by the authors from countries within the region and beyond.

Authors are responsible for any spelling, grammar and stylistic errors in their work.

Conference papers in the *Proceedings TIO 2016* are organized in the following topics:

- Plenary lectures
- Challenges in technical and IT education – from preschool to university
- Information and Educational Technologies
- Professional development of IT and technical education teachers and European educational perspective
- Engineering Education.

Special activities within the Conference are the following:

- Remote experiments - NeReLa Demo session
- Day of Computing
- Poster Session: Research project on Faculty of Technical Sciences

The Scientific and Organizing Committee wish to thank all the scientific and professional employees from various fields who contributed to the Conference.

We would like to thank Partner Institutions which participated as co-organizers of the Conference.

We express special thanks to the Ministry of Education, Science and Technological Development of the Republic of Serbia for financial contribution to this scientific gathering

*Chairman of the Organizing Committee  
Dr Ivan Milićević, Assistant Professor*

## CHAIRMEN'S FOREWORD

Faculty of Technical Sciences Čačak, University of Kragujevac, has the honour to organize International Scientific Conference 'Technics and Informatics in Education – TIO 2016'.

The Conference continues the tradition of gathering scientific associates and professionals in technical, technological and IT education in primary and secondary schools in Serbia. For the last 50 years this assembly has been organized in various forms (scientific and professional conferences and consultations on technical education, information technologies, technical seminars, etc.). These scientific and professional conferences have had a huge impact on the development of technical education, mostly in primary education, as well as in secondary education. The impact is also noticeable in both higher and university education. Five National conferences with International participation titled Technics and Informatics in Education were held in 2006, 2008, 2010, 2012 and 2014. Still, the necessity for continuous, organized scientific assembly related to technics and informatics in new surrounding and connection with other technologies has increased.

The aim of the conference TIO 2016 is to improve the exchange of knowledge and experience between experts, scientific associates and professionals from Serbia, neighbouring countries and Europe, engaged in the subject matter. The conference will provide an analytical review of technical (technological) and IT education, as well as education regarding technical (technological) and IT achievements including assistive technology, teaching aids, student books, etc. Teacher training is considered highly significant for research and development in education in this field.

The Conference includes technical (technological) education at all levels: from preschool institutions, primary and secondary schools over higher and university education, to various forms of lifelong learning.

Furthermore, the special emphasis will be given to the place, importance, and role of informatics and IT in technical and professional education, as well as correlation with other natural, social and education science.

A comprehensive analytical review will be given on the state of education in the fields of technics and informatics, as well as the contribution of technical and IT education to other fields.

The conference results are expected to provide the basis for planning the development of education in Serbia, especially in the fields of technical (technological) education, engineering, IT and informatics. The results are also expected to support and contribute to the exchange of educational patterns in the neighbouring region and coordination with European trends in this field.

We hope that experience gained at the Conference will be very useful both for the participants and for the development of technical-technological education field.
